

LibriSuite

LibriSuite, an open library environment

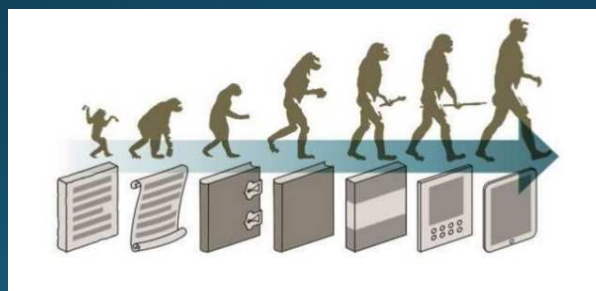

Cristina Garetta
cgaretta@scanbit.net

35th ADLUG Annual Meeting: 'New Libraries-Digital Strategies'
University of the Basque Country (September 21-23, 2016)

Background

- 👉 Libraries have to meet the **evolving needs** of their users
- 👉 Libraries should move to a **more open and flexible** system

Background

- ☞ IT Departments push LMS to become **more interoperable** with other systems (e.g. Finance, Human Resources)
- ☞ **Data-driven** and not device-driven
- ☞ **Open Data Structure**

Challenge for the libraries:
**deliver added value
services**

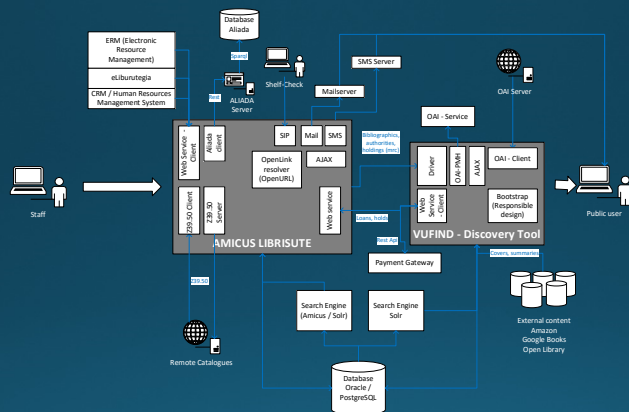

Towards an Integrated Resource Management

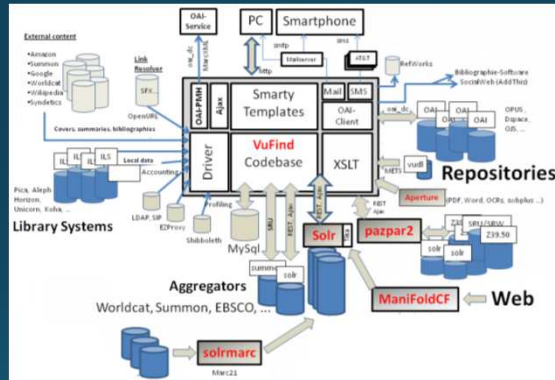

- LibriSuite aims to be an **open platform** for customized application development
- Some changes in version 3 (**PostgreSQL**)
- **No license fee** and open source code for the users community
- **ALIADA module** to share the catalogue as Linked Data
- **VuFind driver** to share the catalogue through a discovery tool and a OAI-PMH server
- **RESTful/SOAP web services** for integration with ERM, CM, E-Books platform...
- **SIP module, Z39.50, SRU, ...**

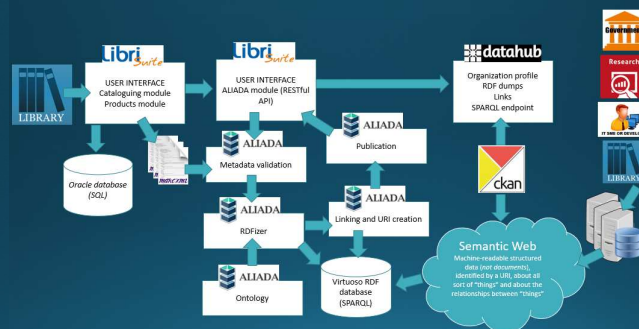

LibriSuite OLE Architecture Scheme

LibriFind Architecture Scheme

ALIADA Architecture Scheme

SCANBIT implements this OLE model around the world!

THANK YOU
FOR
YOUR
ATTENTION!
