

Workshop on "Open Source: modularity and interoperability"

Summarized Report

ADLUG 2017

Participants

Giovanni Aldi

Cristina Gareta

Beatriz Parada

Elena Turienzo

Annalisa Di Sabato

Andrea Gazzarini

Laura Ortigoza

Stefano Bargioni (moderator)

Topic

2012 Open Source Business Logic

2013 Quality of Open Source Tools

2014 Open Source Services

2015 Integration of Open Source and Commercial Software

2016 Users Groups and Communities

2017 Modularity and Interoperability

Basic ideas

- Libraries work with complex software tools
- Components must interact with each other
- Open source leverages modularity and interoperability, but they are present also in commercial software
- Both modularity and interoperability have different levels

The future of open source for libraries

- FOLIO seems the platform where modularity and interoperability are a basic requirement
- How FOLIO will interact with existent software for libraries, both open source and commercial?
- How FOLIO will manage licenses of different modules?

Topic for 2018

Cooperation of libraries to open source projects
and tools
